

Joe Nagan Speaking Topics

WAHI Training Seminar - March 10, 2018

8:00 AM: “**Building Durability Issues with Masonry Claddings**”

This session will examine the problems that can, and are occurring, here in Wisconsin when masonry products are incorrectly installed on wood framed structures.

We'll examine several typical building failures, the causes and options for remediation. Doesn't take much wetting to cause problems when you very little drying!

10:15 AM: “**Attic Ventilation – Can this really work in a cold climate?**”

This session will look at the current UDC Code requirements for attic ventilation and then take a look to see whether it's possible to actually work!

How do you ventilate moisture from a vented attic with cold air? Where did such a concept come from? We have the answers and you'll probably be surprised!
